KAMERA ART OF SERVICE

Kamera full Overhaul

1 year warranty

30-day guarantee Leica History Database

Every Leica we service undergoes a meticulous process to restore its full mechanical performance. We fully disassemblethe camera, inspect each part, and repair or replace damaged components. The entire mechanism is deep cleaned and lubricated with the highest-quality Swiss precision oils and greases for smooth and reliable operation.

The rangefinder is precisely calibrated, and shutter speeds are adjusted according to Leica and ISO standards. Light-blocking materials inside the body are renewed or improved to prevent light leaks. Before returning your Leica, we run a full function test with 35mm film, making sure every function works perfectly — ready to serve you for decades to come.

Leica M2, M3, M4, M4-2, M4-p, M5 - 699,90€ Leica MP, M-A, M6 - 799,90€

Leica M Shutter curtains replacement

1 year warranty

30-day guarantee

Leica History Database

Replacing the shutter curtain is one of the most delicate services we offer. The entire shutter mechanism is disassembled and cleaned, ensuring no old grease, dust, or debris remains. Both shutter curtains are carefully removed and replaced with brand-new light-tight curtains, cut and fitted to match the exact Leica specification. The shutter is then precisely tensioned and aligned to ensure smooth travel and perfect overlap between the curtains. We calibrate shutter speeds according to Leica and ISO standards, testing them across all ranges

Kamera full Overhaul + 199,90 Euro

Leica M6 Light-meter repair

1 year warranty

30-day guarantee Leica History Database

Our light-meter repair service restores your Leica's built-in meter to full working order.

We disassemble the light meter unit, inspect all components, and clean electrical contacts to ensure proper conductivity. Faulty parts, such as the photocell or resistor, are repaired or replaced with high-quality components. The meter is then recalibrated using precision light sources to guarantee accurate readings across the entire EV range. We adjust the system to match the original Leica specifications, ensuring reliable performance with modern batteries.

Kamera full Overhaul + 149,90€

If the light meter can't be repaired, we offer a replacement with a modern unit. However, 9 out of 10 light meter issues can typically be resolved without installing a new unit.

New Light-meter unit - Kamera full Overhaul + 599,90€

Leica M Lens Overhaul

1 year warranty

30-day guarantee

Leica History Database

Every Leica M lens we service is carefully disassembled down to its core components. Each optical element is cleaned from both sides, removing dust, haze, and oil residue without compromising the original coatings.

We repair or replace damaged mechanical parts, apply fresh Swiss precision lubrication to focus and aperture helicoids, and adjust focus accuracy to ensure perfect rangefinder coupling. Aperture blades are cleaned for smooth operation and oil-free performance. The lens is then reassembled, collimated, and calibrated to guarantee precise focus across all distances. Finally, we perform a full optical and mechanical function test before the lens is ready to be used again — built to serve you for decades to come

Rangefinder adjustment

30-day guarantee

Rangefinder adjustment restores perfect focus accuracy to your Leica. We precisely align both the horizontal and vertical rangefinder axes and test them across all distances. However, due to the delicate nature of the mechanism, rangefinder calibration can easily shift during normal use — even from air travel or a bicycle ride. For this reason, we cannot offer a warranty on rangefinder adjustments.

Leica M2, M3, M4, M4-2, M4-p, M5 - **79,90**€ Leica MP, M-A, M6 - **99,90**€

Other repairs

1 year warranty

We offer a wide range of additional repairs to restore your Leica to full functionality. This for example includes replacing damaged viewfinder optics, repairing self-timer units, fixing jammed film advance mechanisms ect. Each repair is approached with the same care and precision as our standard services. The cost of these repairs is calculated individually based on the described issue and the necessary work. Before proceeding, we always provide a detailed estimate for your approval.

KAMERA ART OF SERVICE

How it works?

It's simple: book your service, send us your Leica, and in 30 days, it'll be on its way back—good as new.

Book your service on <u>www.kamera.design/artofservicebooking</u>. Carefully pack your Leica and send it to our address in Prague.

We'll notify you via email when your Leica arrives. From that moment, it will take a maximum of 30 days to service it, backed by our **30-day guarantee**.

We diagnose your Leica, and if the repair cost matches our estimate, we'll send you a standard invoice for the expected repair, including the estimated return shipping costs.

Once the service is complete, we create it's digital record in the Leica History Database.

After your Leica is serviced, we'll securely ship it back to your provided address, complete with all service documents and packaged in a Kamera Art of Service box.

30-day guarantee

We take your photography passion seriously and want you back behind your Leica as soon as possible. Every service comes with a 30-day guarantee. If we take longer, you'll pay only half of the original service price.
